

Satellite and aerial signals are available in each room, completely independent of each other.
[9118](#) outlet plates must be fitted.

In poor terrestrial reception areas, or if you need to provide additional outlets with terrestrial only reception, a setback amplifier such as the [Alcad AI-200](#) can be inserted in the terrestrial input lead. The second output of the AI-200 can be used to feed a F Splitter with up to 8 outlets to provide terrestrial only reception in up to 8 more rooms.

Single cable only required for downloads.
