### Need to connect IP cameras with PoE using coaxial cabling?

Many buildings have infrastructure based on coaxial cable.

If the customer requires PoE IP cameras, and replacing the cabling is impossible or uneconomical, you can use the active ATTE Power XCOAX3 signal convertor to video and PoE over coax.

## Take your time, Keep it Simple

**IP networks can be tricky sometimes**, but if it doesn't work, take your time and don't get frustrated, you'll eventually figure out what is wrong.

- Consider the problem, ask yourself the right questions.
- Do a process of elimination, 95% of the time the solution is simple.
- Make sure there are no address conflicts etc.
- Attention to detail is key.
- Check all cables, ports and plugs.
- If possible, test your device in a known working system.
- Double check any work you have already done.
- And, of course, don't forget to switch off and reboot your device.

**If all that fails, don't be afraid to call us.**

**We provide 100% technical backup on everything we sell.**
